

Why join a garden club?

You only need one of these seven reasons...

1. You have a green thumb.

There's nothing you'd rather do than get your hands dirty by working in your garden.

2. You don't have a green thumb.

Every plant you touch seems to die. Find out what you don't know that other people do.

3. You enjoy flower arranging.

Your friends and family are "wowed" by your beautiful floral designs.

4. You buy flower arrangements.

You don't have a clue how to arrange flowers but you would like to learn.

5. You know people in garden club.

They seem to enjoy the programs, projects and activities shared with their garden club friends.

6. You don't know anyone in garden club.

You would like to meet your neighbors and others in the area who share your interests.

7. You care about your community.

You're interested in conservation, community beautification and other issues that impact your surroundings.
